Schools project in Brazil
Schools project in Brazil

100 Schools and 200 kindergartens in the next 25 years
MAIN PURPOSE

100 schools and 200 kindergartens in Brazil in the next 25 years

• With no lucrative goal
• With academic excellence
• Allowing each pupil a global education based on Christian values
• New model in Brazil, working successfully in other countries
Main Characteristics

- From the families for the families
- Personalized education
- Single sex education
- Integral education
- Positive for society
- Open to all families no matter their income
From families for the families

- Schools basically promoted by families interested in their children’s education.
- The education of children is the parents first duty.
- That is why the parents have the right and the duty to build and open schools according to the families moral, religious and educational beliefs.
Personalized Education

• A genuine education must be personalized, suitable to each pupil’s features.
• A personal education is reached in our model especially through a tutor.
• The tutor meets the pupil and the parents periodically.
• The school is like the family, where each child is unique and cared after according to his or her needs.

Each pupil is unique
Single Sex Education

• A close consequence of a personal education is single sex education.

• With equal opportunities and total respect to the specific features of each sex.

The one who is different shall be treated in a different way.
Global education

• We search a global education for our pupils, which will care for the whole human being.
• We encourage our teachers to be open to the world, to interchange educational experiences and collaborate with other schools.
• Our model requires continuous formation and innovation to our teachers.

A coherent education model from beginning to end
Positive contribution to society

- We shall be an academic reference, our schools can help in the improvement of the education in the country.
- Proficiency in several languages is fundamental in our globalized world. Our project includes learning at least 2 languages.
- The development of new technologies needs to be promoted and integrated at school as an impeller for change.

Parents, teachers, and pupils in our schools will share a humanistic view of the world.
